SUMMARY

Staff-level Apple Platforms Engineer with **14+ years** building production iOS and macOS apps. Deep in Swift, SwiftUI, AVFoundation, SDK design, and real-time media systems. At Backtrack/Yac, I built the original iOS app on a compressed timeline that helped land enterprise customers and unlock approximately **\$2M in potential revenue**. I own ambiguous platform problems end-to-end — from architecture decisions to debugging in production — and partner directly with founders, product, and design to ship things that work.

SKILLS

Apple Platforms Swift · SwiftUI · UIKit · AppKit · Swift Concurrency · Combine · Objective-C · SwiftData · Core Data

Media & SDKs AVFoundation · AVAudioSession · AVAudioEngine · AVAssetWriter · AVPlayer · CoreAudio · CarPlay · AirPlay · SDK design

Delivery & Tools Xcode · Fastlane · GitHub Actions · Xcode Cloud · Sentry · Firebase · REST · WebSocket · CI/CD · Feature flags · AI-assisted workflows

EXPERIENCE

Staff / Lead Apple Platforms Engineer · **Backtrack (Yac, Inc.)** · Remote 2023 — Present

Live-event recording product for iOS and macOS. Owner of the Apple platform stack.

- Built the original iOS app in a compressed timeline, unlocking **~\$2M in enterprise revenue** and landing major customers.
- Architected audio recording with AVFoundation, AVAudioSession, AVAudioEngine, AVAssetWriter, segmented M4A export, and background-safe recovery (interruptions, route changes, Bluetooth, long sessions).
- Shipped SwiftUI flows for real-time meeting states, scan mode, hosted-buyer experience, sponsor/ad screens, and Dynamic Island/live status.
- Integrated WebSocket-driven remote commands (pause, resume, export, snapshots, device actions) coordinated across recording and UI state machines.
- Hardened production with Sentry, feature flags, structured logging, and crash triage; supported live high-pressure events without rollback.

Senior Apple Platforms Engineer · **FloSports** · Remote (via X-Team) Aug 2022 — 2023

- Built athlete profile features (Swift, UIKit, Combine) improving access to athlete data across the iOS app.
- Shipped tracking, metrics, and experimentation surfaces that fed product and revenue decisions.
- Contributed across CI/CD, code review, and release delivery in a distributed team.

Senior Apple Platforms / SDK Engineer · **Super Hi-Fi** · Remote (via X-Team) Sep 2020 — May 2022

- Built a custom Swift SDK for online/offline radio streaming — playback, downloads, offline access, deletion — used by enterprise partners including Peloton.
- Developed a Sonos iOS app from scratch (Swift, UIKit, Combine, Swift Concurrency, AVFoundation, AVPlayer) with CarPlay and AirPlay support.
- Partnered with the CTO and architecture leads on SDK boundaries, API direction, and POCs for strategic partner demos.

Lead iOS Engineer · **Somos Educação — Plurall** · São Paulo / Remote Jun 2017 — Sep 2020

- Led iOS engineering for **Plurall**, one of Brazil's largest education apps — **1M+ active users** across studying, homework, exams, and offline handouts.
- Owned architecture and delivery for major features using Swift, Fastlane, and CI/CD; mentored engineers and shaped API direction with backend and product.

EARLIER EXPERIENCE

AppFactory — Senior/Lead iOS Developer · Nov 2014 – Jun 2017 **Mowa Mobile** — iOS Developer · Jul – Nov 2014

Mistika Post — Lead iOS Developer & Tech Specialist · Mar 2013 – Jul 2014

Earlier iOS work starting 2011 building apps across e-commerce, hospitality, agriculture, healthcare, and consumer products.

PROJECTS & COMMUNITY

- **Spotti** — Solo-built iOS app for location and entertainment discovery; SwiftUI, SwiftData, Swift Concurrency. **Available on the App Store.**
- **StayFocus** — Cross-platform SwiftUI Pomodoro and focus-sound app using WidgetKit and Swift Concurrency.
- **Programando Para Maçã Cast** — Host of a podcast helping Brazilian Apple developers grow their careers and reach global opportunities.
- **Writing** — Author on Medium (Mac O'Clock) and dev.to covering Swift, SwiftUI, and iOS architecture.

EDUCATION

Bachelor of Computer Science · Estácio de Sá, São Paulo

Graduated 2020

Continued learning: **iOS Development** (Stanford / iTunes U) · **Introduction to Algorithms** (MIT / iTunes U) · **Agile Development** (ITA / Coursera)

LANGUAGES

Portuguese (native) · **English** (professional working) · **Spanish** (professional working)
